

Dvorak's Fly-Fishing Expeditions Est. 1969

2019 Schedule Dates

GUNNISON RIVER GORGE below the **Black Canyon of the Gunnison National Park**
"THE BABY GRAND" 14 miles Class II - Class III

It is a hidden jewel, off the beaten path, tucked deep in steep granite walls. The Gunnison River is a sportsman's and Angler's paradise. The clear, cold waters of the Gunnison have been designated a **Gold Medal Trout Fishery**. Its narrow river corridor creates exciting whitewater action on a river that is below the *Black Canyon of the Gunnison National Park*.

Accessible only by foot or horseback, the Gunnison Gorge is a wilderness canyon for those who are willing to literally go the extra mile. A trip to the canyon floor requires a hike of one mile down a steep trail. Guests are expected to carry their personal gear in packs provided by Dvoraks. With every step, the wilderness feeling deepens. The solitude and scenery found at the canyon floor make the hike down worth every step. Enter the wilderness world of the Gunnison Gorge for a trip of one to three days.

SEASON

Due to three dams up stream, the Gunnison is basically run-able year-round. However, weather conditions make the prime boating season mid-May through September. We have over 30 launch dates allocated throughout our season and can arrange alternate launch dates for groups of 5 - 9 people.

The highest water levels are in May and early June during the high snow melt period. The water normally levels out to a steady flow in late June and continues at that level for the remainder of the season.

FISHING

Designated a **Gold Medal Trout fishery**, the Gunnison is one of those legendary stretches that is known throughout the west. Avid anglers speak about this one in whispers around the campfire. "The Home of Lunker Trout" it offers both Browns and Rainbows. The Giant Stone Fly Hatch is

The primary reason for this reputation is the river's inaccessibility. There are only three trails leading into the Gunnison Gorge giving access to approximately one mile of bank fishing at each trail head. The only way to fish the entire corridor is float fishing. Our CUSTOM fishing trips put two anglers and one guide in each raft. This allows you to fish downstream at your own pace. To allow for adequate time for fishing and full enjoyment of the canyon, it is best to plan a three-day trip. Special regulations are in effect to protect the fishery which allows only one fish over 16" and two under 12" can be kept. Fly and lures only. We encourage everyone to catch and release. A valid Colorado fishing license required.

"We also offer custom Trout fishing trips in Wyoming, Idaho and throughout Colorado on the best Trout rivers in the U.S." (GOLD MEDAL AND BLUE RIBBON WATERS).
